Srikanth Senthilkumar

Software Developer

Chennai, India — +91 63799 25198

senthilsri1106@gmail.com — LinkedIn — GitHub — Portfolio

Professional Summary

Aspiring **Software Developer** with a strong foundation in Programming, Information Systems, and Systems Analysis. Expert in full-cycle Application Development, Database administration, and adhering to Industry standards. Committed to Ethical engineering practices, sound Judgements, and driving measurable System enhancements for enterprise clients.

Technical Skills

Core Competencies: Systems Analysis, Database administration, Center operations, Application Development, Network operations, Data center Management, Industry standards, Programming.
Frontend & Programming: Next.js, React.js, Tailwind CSS, UI/UX, WebSockets, Accessibility, SEO.
Backend & Cloud: Node.js, Express.js, Supabase, Firebase, GCP, REST APIs.
Languages: JavaScript, TypeScript, Dart, Python, Java, C.
Tools: Git/GitHub, GitHub Actions, VS Code, Android Studio, MongoDB, Oracle SQL, Power BI.

Experience

DreamPi (dreampi.in) *Jun 2025 – Present*
Lead Frontend and Full-Stack Engineer

- Led the Application Development of production-grade Business applications using Next.js and GCP, resulting in a 25% increase in user engagement.
- Managed Center operations workflows and performed critical Database administration on Supabase, optimizing indexing strategies to reduce query latency by 40%.
- Executed System enhancements and structured Programming logic to optimize Core Web Vitals, maintaining consistent Lighthouse scores above 90.

Strategyfox Pvt. Ltd., Chennai *May 2025 – Jul 2025*
Frontend Intern – WebXR Project

- Developed immersive Information Systems using React and Three.js Programming, improving scene loading performance by 30%.
- Enhanced scene optimization using Industry standards, reducing asset load times by 1.5 seconds.

Projects

Water Quality Optimization Digital Twin *Python, Scikit-Learn, Random Forest, Gradient Boosting*

- Built a machine learning control system simulating an industrial wastewater treatment plant to optimize chemical dosing and aeration.
- Implemented Champion/Challenger model selection, projecting annual operational savings of $98K while ensuring environmental compliance.

Plastic Injection Molding Quality Control *Python, Pandas, Scikit-Learn*

- Developed RegressorChain and Gradient Boosting models on synthetic time-series data to predict manufacturing quality metrics.
- Conducted dual-noise dataset analysis (5% vs 15%) to evaluate model robustness and optimize hyperparameters using GridSearchCV.

Virtual AI Interviewer Platform *React, Node.js, WebXR, PWA*

- Engineered a Progressive Web App (PWA) configured for offline functionality and seamless cross-platform installation.
- Integrated WebXR support for Meta Quest VR headsets to provide an immersive, one-on-one virtual interview environment.

Tamil Movie Metadata OCR Extractor *Python, TMDB API, Optical Character Recognition*

- Automated data extraction from images of Tamil movies utilizing Python and OCR technology.
- Integrated the TMDB API to fetch, cross-reference, and structure comprehensive movie details dynamically.

R3F Virtual Group Discussion Platform *React Three Fiber, Node.js, 3D/WebXR*

- Created an interactive 3D virtual group discussion space leveraging React Three Fiber for complex scene rendering.
- Integrated real-time backend synchronization to manage concurrent participant interactions and spatial presence.

Chisel Yourself – Personal Development Platform *Next.js, Node.js, Supabase, GCP*

- Deployed a scalable content delivery platform utilizing CDN optimization to achieve sub-3s global load times.
- Developed structured learning paths with progression tracking, boosting user engagement and completion rates by 20%.

Update Cars – Dealer Inventory Platform *Next.js, Node.js, Supabase*

- Delivered an inventory management system featuring real-time stock status, reducing data discrepancies by 90%.
- Streamlined database administration for vehicle records and implemented secure payment integrations.

Education

SSN College of Engineering *Sep 2023 – Present*
B.E. in Computer Science and Engineering — CGPA: 6.343

Thiagarajar Polytechnic College *Nov 2020 – Jun 2023*
Diploma in Computer Science — Percentage: 87.4%

Courses and Certifications

- Introduction to Industry 4.0 and Industrial Internet of Things
- Affective Computing — Privacy and Security
- Google GEN AI Study Jams — Foundations of User Experience Design(Google)

Extra-Curricular and Leadership

- **National-Level Cricket Athlete:** Demonstrated teamwork, discipline, and composure under pressure.
- **District Athletics Champion:** Consistent top performer across multiple track and field events.
- **400m Hurdles Record (1:02):** Proven endurance and focus through continuous performance improvement.
- **Karate Black Belt:** Showcased commitment, leadership, and structured practice discipline.
